REACH 1907/2006/EU

Dear Sir or Madam

The REACH regulation does not require any certificates (or confirmations of conformity etc.). Consequently, as a supplier / manufacturer of fastening technology products, we cannot confirm full compliance with the REACH regulation.

Nevertheless, two regulations are important from a REACH perspective:

Notification or information obligations according to Article 7, paragraph 2 or Article 33

According to Article 33(1), suppliers must inform the recipients (companies) of their products if they contain a substance of very high concern (SVHC) that has been included on the candidate list in a proportion of more than 0.1% by mass. At least the name of the substance in question must be disclosed.

Restrictions according to Annex XVII

The restriction list (Annex XVII of the REACH Regulation) contains a list of substances that may either not be contained at all or only in small quantities in certain products. As a supplier, we ensure that the products we sell do not fall under any of these restrictions.

In order to comply with this, TOX-Dübel-Technik GmbH informs you that the following products contain substances subject to SVHC of more than 0.10 percent by mass:

Product	SVHC > 0,10 mass percentage
Apollo	Lead CAS No. 7439-92-1
Brush	Lead CAS No. 7439-92-1
Control	Lead CAS No. 7439-92-1
Thermo Proof Mini	Lead CAS No. 7439-92-1
Impact	Lead CAS No. 7439-92-1
MAG Clip	Decamethylcyclopentasil oxane (D5) CAS No. 541-02-6
Metrix	Lead CAS No. 7439-92-1
Pirat Eddi	Lead CAS No. 7439-92-1
Spagat / Spagat Pro / Oase Spagat / Oase Spagat Pro	Lead CAS No. 7439-92-1

Best regards

TOX-Dübel-Technik GmbH
